

A2

Figure 4 is a plan view of a diskette illustrating the typical composition of a computer-readable medium;

Please replace lines ~~15-17~~ on page 15 with the following:

A3

Figure 5 is a plan view of a portion of the diskette of Figure 4 but particularly illustrating a method of modifying the magnetization of the diskette by laser according to the present invention;

Please replace lines ~~19-20~~ on page 15 with the following:

A4

Figure 6 is a plan view of the major portion of an optically-readable medium illustrating the present security in the form of optically-readable data stored thereon;

Please replace lines ~~22-24~~ on page 15 with the following:

A5

Figure 7a is a view of a portion of the optically-readable medium of Figure 6 illustrating the location where a unique identifier may be placed according to the present invention;

Please replace lines ~~26-27~~ on page 15 with the following:

A6

Figure 7b is a raised elevational view of a standard configuration of data physically positioned on converted optically-readable media;

Please replace lines ~~29-30~~ on page 15 with the following:

A7

Figure 7c is a raised elevated view of a configuration of data physically positioned on optically-readable media according to the present invention;

Please replace lines 32-33 on page 15 with the following:

A8 Figure 8 is a view of a portion of the optically-readable medium of Figure 6 having a pre-programmed identifying chip operatively associated therewith;

Please replace lines 1-3 on page 16 with the following:

A9 Figure 9 is a view of a portion of the optically-readable medium of Figure 6 relative to a co-operating media-driven hub according to an alternate embodiment of the preferred invention;

Please replace lines 5-7 on page 16 with the following:

A10 Figure 10 is substantially a side view of a portion of the optically-readable media of Figure 7 with a blown-up, edge-on view of the code-containing portion of the media associated therewith;

Please replace lines 9-10 on page 16 with the following:

A11 Figure 11 is a diagrammatic view of a projector security embodiment of the present invention;

Please replace lines 12-13 on page 16 with the following:

A12 Figure 12 is a side-elevational view of a system for prohibiting replication of visualizable media; and

Please replace lines 15-16 on page 16 with the following:

A13 Figure 13 is a side-elevational view of a system for limiting use of a visualizable media to a specified projection device.
